Bachelor Degree in Law or higher

Company Profile

DEAIFIS Advocates & Legal Consultants has served the United Arab Emirates' business and government sectors for over a decade. We have won countless cases and advised some of the nation's most prominent figures on matters of law from establishing new ventures to the merger & acquisition of established corporations; and we have resolved hundreds of disputes ranging from divorce to property ownership issues to breaches of contract and so on.

Deaifis has experience in virtually every sector: government, banking & finance, real estate, manufacturing, aviation & logistics, telecommunications & utilities, consumer goods and others. Our lawyers have practiced their profession throughout the Middle East and North Africa; and our knowledge of the laws that apply to the United Arab Emirates has made us the preferred counsel of businesses and government leaders throughout the nation.

Abdullah Deaifis established the firm in 2003. Although it was headquartered in the emirate of Sharjah, Abdullah and his team of 3 handled cases in all 7 emirates, the others being Abu Dhabi, Dubai, Ajman, Umm al Quwain, Fujairah, and Ras Al Khaimah. The files were primarily corporate and criminal in nature; however, by 2005 the team was asked to address intricate issues in finance, insurance, aviation and real estate. As a result, Deaifis brought expert lawyers on board that addressed the unique requirements of the market. As the economic crisis hit the region in 2008, Abdullah again adapted the practice's offering bringing in stronger back office support and researchers for the increase in litigation requirements. As the business environment begins to stabilize, the Deaifis practice is well positioned to successfully navigate the UAE's evolving legal system.
